

To whom it may concern

Ref: Emergency Triage, Manchester Triage Group

The Manchester Triage Group (MTG) no longer supports the 1996 or 2006 editions of Emergency Triage. These have now been superseded by the 2014 version of Emergency Triage: Manchester Triage Group, 3rd Edition ISBN: 978-1-118-29906-7.

The MTG is clear that a number of changes since 1996 are matters of Clinical Safety and that patients being triaged using many of the 1996 or 2006 algorithms will be at risk of mis-triage and may therefore have worse clinical outcomes.

MTG strongly advises all users not only to upgrade to the latest edition but also to ensure that any software provider is compliant with the critical upgrade process that is now in existence.

MTG will not support users of MTS 1e or 2e in court but will send a letter to the above effect to any medical negligence proceedings.
